

Sunless Tanning Guide

To achieve the best results for your tan, please minimize the use of the following listed products in the extended guideline below.

- Anti-acne exfoliators or products like antibiotics or other medications that dry the skin
- Anti-aging products
- Toners with alcohol or witch hazel in high doses
- Adhesive strips that may pull off tan
- Bar soaps with deodorant or anti-bacterial varieties
- BHA Products like beta hydroxy or salicylic acids
- AHA products like alpha hydroxy acids, glycolic, lactic, malic, citric and tartaric acids
- Insect spray, perfume, body spray when directly applied to tan which can remove or fade the tan. As a substitution, we recommend spray onto the clothing or dispersing as a mist.
- Curel Lotion
- Wax or hair removal products
- Hair-inhibiting lotions
- Retin-A type products
- Dull razors
- Make-up removers or oils meant to remove eye makeup
- Hot tubs or swimming pools
- Bathing with a loofah, scrub brush or exfoliating gloves that may be abrasive to the skin.

To achieve the best results for your tan, please utilize these practices or products listed in the extended guideline below.

- Avoid tanning during menstruation as hormonal changes can affect the coloring of tan
- Increased workouts may shorten the lifespan of color
- Use Infinity Sun Extenders to moisturize skin during winter months
- Drier skin produces darker tans
- Powder sweaty areas with Gold Bond talcum powder
